netVigilance SecureScout gets CVE compatible stamp

Compatibility Certification awarded at InfoSec World Conference and Exposition

ORLANDO, Florida – April 5th, 2005 – netVigilance Inc. an authorized distributor of SecureScout., a leading supplier of advanced Network Vulnerability Assessment and Management software for corporations announced today complete CVE compatibility for the entire SecureScout line of Vulnerability Assessment scanners.

The CVE labs has finished evaluating the mapping accuracy of SecureScout and awarded full CVE compatibility. "[CVE-compatible](#)" means that a product or service uses CVE names in a way that allows it to cross-link with other repositories that also use CVE names, as documented in the [CVE compatibility requirements](#).

"While we have always referenced CVE and CAN numbers in our test cases. The official certification from Mitre; reassures our customers and partners that CVE specific vulnerabilities are all covered." Stated Ron Cox; VP Sales for netVigilance.

Robert Martin; CVE Compatibility lead at [Mitre Corp.](#) was quoted as saying "We are excited to add netVigilance to the growing list of vendors that are certified to be CVE compatible. Every product that is added strengthens the network of security professionals that are bonded by the CVE dictionary. This has a huge impact on the user community by significantly easing the task of identifying and managing the most critical network vulnerabilities."

“With a few mouse clicks, users can select a CVE / CAN only profile or cross-reference their policy configuration to CVE reference numbers.” Cox noted. “This is a powerful tool for speeding remediation and verifying regulatory compliance.”

SecureScout's distributed architecture, comprehensive standard reports, open MS-SQL database and best quality of results; make it the best choice for proactive network security.

About netVigilance

Founded in 2003, netVigilance delivers best-in-class solutions for protection of corporate networks. With it's SecureScout™ line of vulnerability assessment tools; netVigilance will ensure increased profitability, increased operational efficiencies, Higher productivity and decreased downtime by increasing the efficiency of network security operations.
