***** For Immediate Release *****

netVigilance Inc. announces GLBA Safe Scan; regulatory compliance risk assessment for the finance industry.

Reduce overhead and assure regulatory compliance in protecting your customer information systems against cyber-attack.

BEAVERTON, Oregon -- October 4, 2004 – netVigilance Inc., an authorized distributor of SecureScout™; advanced Network Vulnerability Assessment and Management software for corporations announced today the release of a test profile; GLBA Safe Scan for the popular SecureScout™ line of Network Vulnerability Assessment tools; to meet risk assessment requirements for the Gramm-Leach-Bliley Act (GLBA) for protection of customer information in financial institutions.

“The job of regulatory compliance for Corporate Information Security Officers at financial institutions; is an extremely labor-intensive task that is fraught with risk” stated Jesper Jurcenoks; CEO at netVigilance. “Vulnerability assessment and remediation are consuming resources at an alarming rate due to the frequency and destructiveness of today’s cyber attacks” said Jurcenoks.

“With GLBA Safe Scan, SecureScout becomes the most powerful tool to bring cost savings and increased productivity to IT professionals worldwide. By leveraging the large SecureScout installed base; CSO’s & CIO’s can rest assured that they are testing for, and eliminating the largest possible number of vulnerabilities at a given

time that could lead to a compromise of their customer information systems” said Jurcenoks.

With its unique and unmatched distributed architecture, Extensive reporting, largest number of detected vulnerabilities and the fewest number of false-positives; SecureScout from netVigilance is the industry leading solution for Corporate Network Vulnerability assessment.
